

注意事項

(1)

新增客製欄位"**DHF**"(如下圖)，並且設定到「預設工作項目欄位」；

若不再需要"**DHF**"欄位，必須先移除「預設工作項目欄位」的"**DHF**"，再將客製欄位"**DHF**"刪除；否則以後「預設工作項目欄位」就再也無法使用了。

The screenshot shows the OpenProject interface for 'Work Item Tracking' settings. The left sidebar contains navigation links: 設定 (Settings), 類型 (Type), 狀態 (Status), 工作流程 (Workflow), and 自訂動作 (Custom Actions). The main content area is titled '工作項目追蹤' (Work Item Tracking) and includes several settings:

- 允許跨專案的工作項目關聯 (Allow cross-project work item association): ☒
- 預設在主專案中顯示子專案的工作項目 (Default show sub-project work items in main project): ☒
- 使用目前日期作為新工作項目的開始日期 (Use current date as start date for new work items): ☐
- 進度計算 (Progress calculation): **Work-based**. Below this, a note states: "In *work-based* mode, % Complete is calculated from how much work is done in relation to total work. In *status-based* mode, each status has a % Complete value associated with it. Changing status will change % Complete."
- 預設突顯模式 (Default highlight mode): **專案屬性** (Project properties).
- 預設突顯屬性 (Default highlight properties): ☒ 狀態 (Status), ☒ 優先等級 (Priority), ☒ 完成日期 (Completion date).
- 預設工作項目欄位** (Default work item columns): This section is highlighted with a red box. It includes a '增加欄位' (Add column) button and a '重新排列' (Reorder) section. The '重新排列' section shows a list of columns: ID, DHF ×, 已歸檔 × (Archived), 共用 × (Shared), 文件提交期限 × (Document submission deadline), 名稱 (Name), 階段 × (Phase), 文件編號 × (Document number), and 文件版本(清單) × (Document version (list)). Below this list, there are buttons for '電子檔 ×' (Document), '紙本 ×' (Paper), and '專案 ×' (Project).

若出現「預設工作項目欄位」無法使用，請手動將OP資料表settings的"work package list default columns"資料調整即可
