

# 設定非工作日

非工作日將不納入專案日程

The screenshot shows the 'Working Days' settings page. The sidebar on the left contains the following items: 概要, 使用者與權限, 工作項目, 自訂欄位, 屬性說明文字, 條列項目, Calendars and da... (highlighted with a red box and annotation 1), 系統設置, 郵件與通知, API and webhooks, 身份驗證, 公告, 設計, 顏色, 企業版, 時間與費用, 待辦事項, 文件儲存空間, and 擴充套件. The top navigation bar includes a search bar and a '管管' button. The main content area has a warning box at the top stating that working days affect the start and finish days of all work packages and that changes are only applied after clicking the 'Apply changes' button. Below this, the 'WORK WEEK' section shows a list of days: 星期一, 星期二, 星期三, 星期四, 星期五 (all checked), 星期六, and 星期天 (unchecked). A red circle with the number 2 is next to the checked days. The 'HOLIDAYS AND CLOSURES' section shows a date selector for 2024 and a box for 'Non-working days' with a message: 'No specific non-working days are defined for this year. Click on "+ Non-working day" below to add a date.' A red circle with the number 3 is next to the '+ Non-working day' button. At the bottom, there is a blue button labeled 'Apply changes'.
