

設定非工作日

非工作日將不納入專案日程

The screenshot displays the 'Working Days' configuration page. The sidebar on the left contains various system settings, with 'Calendars and da...' (Calendar and dates) highlighted by a red box and labeled with a red circle '1'. The top navigation bar includes a search bar and a '管管' (Manage) button. The main content area features an orange informational box at the top stating that working days affect project scheduling and that changes are applied after clicking the 'Apply changes' button. Below this, the 'WORK WEEK' section shows a list of days from Monday to Sunday. Monday through Friday are selected with blue checkmarks, while Saturday and Sunday are unselected. A red circle '2' is placed next to the 'Working days' label. The 'HOLIDAYS AND CLOSURES' section shows the year '2024' and a message indicating no specific non-working days are defined. A button labeled '+ Non-working day' is highlighted with a red box and labeled with a red circle '3'. At the bottom of the main content area is a blue 'Apply changes' button.
